

Muhammad Faran Ullah Khan

Machine Learning Intern / Aspiring AI Engineer

✉ faran.khan.dev@gmail.com 📞 Phone: +92 315 8691213 📍 Location: Peshawar, Pakistan

🌐 LinkedIn: linkedin.com/in/faran-khan-dev 📁 Portfolio 🐙 Github

Professional Summary

Aspiring AI Engineer and Machine Learning Intern with hands-on experience in Python, NumPy, Pandas, Scikit-learn, and Flask. Currently completing the FlyRank Machine Learning Internship, where I am building practical machine learning pipelines, analyzing datasets, training predictive models, and evaluating model performance. Recently completed the Anthropic Academy AI Fluency: Framework & Foundations course through the FlyRank AI Internship, strengthening my ability to collaborate with AI systems effectively, responsibly, and critically. I enjoy solving real-world problems with data and continuously improving my knowledge of artificial intelligence. My academic background in Physics has strengthened my analytical thinking, mathematical reasoning, and problem-solving skills, which I apply when developing machine learning solutions.

Technical Skills

Programming Languages

Python, SQL, JavaScript (Basic)

Tools:

Git, GitHub, VS Code, Postman, Google Colab

Machine Learning

Machine Learning Fundamentals, Supervised Learning, Regression, Classification, Data Preprocessing, Feature Engineering, Model Evaluation, Data Visualization

Libraries & Frameworks

NumPy, Pandas, Scikit-learn, Matplotlib, Flask, Joblib, Jupyter Notebook

Experience

Machine Learning Intern, FlyRank AI

July 2026 – Present

- Build practical machine learning solutions using Python and Scikit-learn.
- Prepare and clean datasets for model training and evaluation.
- Perform feature engineering and data preprocessing for machine learning workflows.
- Compare rule-based approaches with machine learning models to improve prediction quality.
- Analyze model performance using evaluation metrics and generate reports.
- Document experiments and manage project versions using Git and GitHub.

Projects

House Price Prediction API

Python, Scikit-learn, Flask, NumPy, Joblib

- Trained and evaluated a regression model for house price prediction.
- Built a Flask REST API that returns predictions from JSON requests.
- Serialized the trained model using Joblib for deployment.
- Designed REST endpoints for easy frontend integration.

Education

BS Physics: University of Science & Technology, Bannu

2020 – 2025

- Strong foundation in mathematics, analytical thinking, and scientific problem-solving, which supports my work in machine learning and data analysis.

Diploma in Information Technology, KP Board Peshawar

2019 – 2020

Certifications

AI Fluency: Framework & Foundations, 2026

Anthropic Academy, Through FlyRank AI Internship

Python Project for Data Engineering, Coursera 2025

CAREER OBJECTIVE

To begin my career as a Machine Learning Engineer or AI Engineer, where I can apply my knowledge of Python, machine learning, and data analysis to solve real-world problems while continuing to grow through practical experience and continuous learning.
